REFLECTION ON LEAGUE

"Blot Upon Modern Civilization" Decried By Republic's Secretary.

Pailure to give the Korean people an opportunity to present to the Peace Conference their demand for independence will be a "reflection on your league of nations, and certainly a blot upon modern civilization," according to a communication which has been adtreased to President Wilson and Premier Clemenceau by the provisional covernment of the Republic of Korea. The two letters, which are identical, and M.Clemenceau by Kiusik Kim, Ko-rea's delegate to the Peace Conferwho is now in Paris, advices to Korean headquarters here yesterday declared. The letters were written by Dr. Syng-

Korean people.

"The Korean people have solemnly sworn to resist all existing authorities in Korea other than those of their own provisional government. The only way the Korean people can be com-pelled to submit to the illegal, im-moral and self-appointed authorities is by using brutal force. I regret to state to you that brutal force is now niscuously used to suppress the independence movement of the Ko-

New York Business Men Enthusiastic Over Prospect, Holland Declares.

When New York business men re turn from a visit to Washington, as some have done within a day or two, they bring back reports of the enthusiasm and optimism respecting business conditions and the prom the Democratic party now has 55 ise of the immediate future which per cent of its members in the Upper House pledged to spffrage, and the they say, compare well with a like they say, compare well with a like feeling which prevails in the securi ties market in New York.

The board has had excellent opportunities for ob-taining reliable information about business conditions and prospects

in all parts of the country.

Undoubtedly it is this information which has been gradually communicated to the Washington public, and this in part, at least, explains the prevailing belief at the Conital that we are on the eve of Capital that we are on the eve of great business prosperity the mag-nitude of which it is difficult to

When it is recalled that early in this year the anxiety was great lest many thousand men and women who were anxious to secure employmen could not find it, then it will be real ized how rapid the recovery has been, so rapid that the floating supply of labor was in April almost completely absorbed with the prospect that there would be work in plenty for all who are ready to accept the opportunity.

There appears to be in Washingto a growing feeling of impatience similar to a feeling which prevails in this Paris has been procrastinating, and also some doubt as to whether its final findings may be accepted until

ome months have passed. The comment is frequently heard in the financial district of this city that the chief obstacle that stands in the way of the rapid coming of abundant prosperity is the delay and doubt which are associated with the Peace

In fact, the feeling is so strong that some are heard to say that for the sake of American business and prosperity it may be the better part to rush through the Peace Conference proceedings and for the Senate of the nited States speedily to ratify any treaty which may be placed before it. It seems also to be the understanding that prices for almost all com-modities will not fall below the pres-sent standards, at least until several months and perhaps a year have passed. Nevertheless, industry and

be no sudden change in price standards. If they were convinced that prices would be maintained at present standards for a long while, then they would be ready to go into the market and buy stocks of goods.

Now they seem to be thus persuaded and for that reason are entering the markets. In the Federal district in which New York is situated it is apparent that buyers are now placing orders, confident that prices will be maintained, and manufacturing is also in progress in a satisfactory way.

It may be that the imposition of new taxes upon luxuries explains the somewhat astonishing falling off in the imports of luxuries which will take place in the present fiscal year. The statisticians say that the falling off in precious stones is so heavy that in the eight months of the present fiscal year they were of the aggregate value of seventeen million dollars, whereas in the corresponding months of the preceding year they were thirty-two millions.
